

The logo for SIP Technologies, consisting of the letters 'SIP' in a stylized, blue, sans-serif font. The 'S' is a simple curve, the 'I' is a vertical bar with a dot, and the 'P' is a vertical bar with a curved top. The background is a light blue gradient with several copper coins scattered around.

Sanitise it Perfectly

OMEGA

For Just a Few Cents a Day, SIP Omega Sanitises Your Bottled Water Cooler Every 24 Hours!

Sanitise DAILY with the most effective, eco friendly product on the market!

Did you know that the clean, fresh smell in the air after a thunderstorm is ozone? Ozone has been used for over 100 years to safely purify bottled water. Now, your bottled cooler is sanitised the same way, naturally and completely chemical free! Using activated oxygen the Omega circulates micro bubbles of ozone through the cooler sanitising it completely in just a few minutes. We've packaged lightning in a bubble!

SIP Omega ensures pure, delicious water

Choosing a cooler with SIP's patented Omega technology promises the freshest and purest water on the market. A visible LED is your reassurance that the Omega is working at optimum performance. The Omega includes a bottle leak preventer, emergency flow shutoff and audible alarm to keep trouble in check. The Omega is programmable to sanitise at a time suitable for your customer.

Omega Saves You Money

Unlike regular UV sanitisation which runs 24/7, the Omega works for just a few minutes each day, saving energy, costly bulb changes and maintenance fees. The Omega is working to save money for you!
